Career Objective

Computer Science B.S. and Applied Math B.S. Passionate about robotics, game/film dev, app/web dev, and automated workflows using AI agents. Knowledgeable in data structs/algos, OOP, probability, stats, differential equations, linear algebra, CAD, CAD/IDE-integrated AI tools, CI/CD, etc. I am currently working on projects in video game development using Unreal Engine 5 and automation projects using AI agents. I am currently working as a coding reviewer for Outlier and a physics/engineering teacher at Merrill F. West High School for their Space and Engineering Academy. I also am the advisor for the Robotics Club at West High, we compete in VEX V5 Robotics.

Education

University of California, Davis

Bachelor of Science: Computer Science

Bachelor of Science: Applied Mathematics

Graduated March 2023

Relevant Coursework Outside of Majors

Physics: Mechanics, Physics: Thermodynamics, Physics: Electromagnetism, Modern Physics, Linux / Shell Scripting, Circuits I, Circuits II, Computer Architecture, General Chemistry

Purdue University (via Edureka)

9-month post-graduate program in DevOps

October 2023 - July 2024

6-month post-graduate program in AI & ML

October 2023 - April 2024

Teachers College of San Joaquin: IMPACT Program

Single Subject Teaching Credential: Physics

October 2024 - June 2026

ELVTR

"Multi-Agent AI For Game development" Course by Joshua Burdick

June 2026 - September 2026

Technical Skills/Tools:

Productivity tools: Microsoft Excel/Word/Powerpoint, Google Sheets/Docs/Slides

Programming Languages: C/C++, Python, MATLAB, R

Markup Languages: HTML, LaTeX

Machine Learning Python Libraries: PyTorch, TensorFlow, Pandas, Keras, NumPy

IDEs: Cursor, Visual Studio, VS code, repl.it, Jupyter Notebooks, Eclipse, Overleaf

Environment Management: Anaconda

Version Control: Git

Database Management: SQL

Self-hosting: Docker, GitHub

CI/CD: GitHub Actions

Containerization: Docker

Operating systems: Windows, Linux, Unix

Chat/Coding LLMs: Claude, Claude Code, Gemini, ChatGPT, Codex

Agentic workflows: n8n, Claude Agent SDK, Claude Managed Agents

CAD: Meshy.ai, Copilot 3D, Blender, Maya, Onshape

Manufacturing Equipment: Sovol/Prusa/BambuLab 3D printers, FSL Muse CO₂ laser cutter

Game/Video Development Engines: Unreal Engine 5

Projects

Converter of image of handwritten document to LaTeX file

Built a program that receives a picture of a handwritten math document and converts it into a LaTeX file of that handwritten math document using Handwriting OCR and Python.

Automation of detection of bird-dominated movement in radar images via ML

Working with the company *Agrinerds*, helping manage the Highly Pathogenic Avian Influenza (HPAI) disease being carried by waterfowl which has been a major cause of the depopulation of over 90 million poultry in North America via two outbreaks: (2014-2015, 2022-present). Providing assistance for the use of NEXRAD radar images to track what areas had bird-dominated movement using image-processing based machine learning to automate identifying which radar images were bird-dominated and which were not.

Virtual Settlers of Catan

Built my own online version of *Settlers of Catan*, using MATLAB app designer in conjunction with Thingspeak in order to make it online-compatible.

FPS-style 1-on-1 Castle Attack and Defense game using Unreal Engine 5.

Developing a game similar to Clash Royale, but the player is more immersed into the fight with multiple shifting perspectives, and it has much more detailed graphics and artwork. The gameplay is similar to Clash Royale, but instead of a top-down view, the player is immersed into the gameplay, giving each player a movable character to fight alongside their generated armies, defenses, etc.

AI Agents to automate processes at work

Using Claude Code, n8n, Claude Agent SDK, and Claude Managed Agents to create agentic workflows that have automated many of my redundant processes in teaching. These workflows include automated grading, automated Excel sheets for grades/budgets, automated lesson planning, and automated creation of instructional documents.

Work Experience

High School Physics and Engineering Teacher, and Robotics Coach

Tracy Unified School District - Merrill F. West High School

August 2024 - June 2026

I taught classes in the Space and Engineering Academy at West High. In addition to their rigorous class requirements, students in the academy are given additional responsibilities that I help oversee, such as community service, senior projects, and other events. Please check out our website here:

<https://sites.google.com/view/whssea/home>

Here are the classes I taught:

-AP Physics C: Mechanics

-AP Physics 1

-Academy Physics (broader physics taken by the freshman in the SEA academy; it covers a very broad scope, including kinematics, forces, energy, optics, sound, electricity, nuclear physics, and others)

-Engineering Design (app projects, bridge projects, rocket projects, robotics projects, etc.)

-Product Design (teaching 3D printer usage / laser cutter usage / electronics to help students create their own manufactured products).

I also am the advisor for the Robotics Club at West High. We cap our size at 48 students (8 teams of 6) that compete in **VEX V5 Robotics**. In 2026, we had 4 teams make the regional championships and raised over \$25000 through fundraisers and hosting tournaments. For more information about VEX, please check out its website. Here is a link to this year's game:

<https://www.vexrobotics.com/v5/competition/vrc-current-game>

Coding Reviewer for AI Training Data

Outlier

May 2024 - Present

Working in projects that are focused on improving the coding abilities of AI LLMs.

Substitute Teacher

Tracy Unified School District

April 2024 - Present

Mathematics Instructor

Mathnasium - The Math Learning Center

Jan 2023 - Present

Tutoring children and teenagers in various ranges of mathematics

UC Davis Student Housing and Dining Services Caterer

Olive & Vine Catering

Apr 2022 - Mar 2023

Planning and providing for all catering events for various UC Davis departments.

Instacart Grocery Deliverer

Instacart

Apr 2022 - Mar 2023

Warehouse Associate

Amazon

Mar 2021 - Oct 2021
